

ASSESSMENTS:

As part of the In-House Training and Follow-Up Groups, each participant must complete the career-interest, the work-skills, and the barriers assessment inventories. These self-administered inventories will help the trainers better assess the participants' strengths, weaknesses, interests, and barriers. These inventories are **not** tests, therefore, there are no right or wrong answers. These inventories are designed only to highlight the unique needs of each participant. The assessment takes about two hours to complete.
